

# Implementation of the ACS Quality Improvement Framework in Cancer Programs

Eileen Reilly, MSW

Manager, Quality Improvement, Cancer Programs

**I have nothing to Disclose**

# Current State of QI in Cancer Programs' Standards

## CoC

1 QI Project required using recognized performance improvement methodology

Implemented in 2020; Aligned with MBSAQIP QI initiative standard

## NAPBC

2 QI Studies required; one of which can be participation in specialty-specific QI database

Revised standard will align with CoC requirements (implementation in 2024)

## NAPRC

No dedicated QI project required

Each year, program must do a compliance audit for 13 standards and implement action plans

# QI Framework Focus Group

- Focus groups to review the Framework
  - Varying degrees of familiarity with QI
  - Varying positions (quality coordination, Physician quality lead, oncology navigator, etc)
- Volunteers responded to three questions using a 1-9 scale
  - Clarity
  - Adding strength
  - Presenting significant barriers or challenges

Write a short narrative describing the impact the problem is having on the providers/hospital.

	1 (strongly disagree)	2	3	4	5 (neutral)	6	7	8	9 (strongly agree)
This is clear and my program could respond with the information as requested <i>* must provide value</i>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Responding to the information requested would likely strengthen (or benefit) my QI initiative <i>* must provide value</i>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Responding to the information requested would create significant barriers or challenges <i>* must provide value</i>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

# 30 day follow up

## Implementation challenges

# Results

## Generally:

- Positive feedback to the Framework and standardizing QI processes
- Volunteers liked having a structured template, criteria to guide projects

## Considerations:

- Areas of criteria that may be overlapping
- Including an “NA” or “unable to assess” option
- Different program types (some settings have fewer resources or dedicated QI staff)

## Questions that remain:

- What education and training is needed for staff and leadership?
- What information is needed at the organizational level?
- How can Cancer programs leverage existing infrastructure to strengthen QI projects?

# Next Steps

Reach out if you...

- 1) want to use the framework or any of the tools
- 2) provide feedback so we can continue to build tools and the framework
- 3) need help defining a QI project – we're working with accredited programs now to set up a successful projects for 2023.
- 4) if you have an example project you think is a great case study that we can share with others
- 5) want to be notified as new tools are available
